MATERIAL SAFETY DATA SHEET (REACH)

In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2015/830

C **REVESTIMIENTO LISO "RP-70"** Macy Code: 50021 **SECTION 4 : FIRST AID MEASURES** 4.1 **DESCRIPTION OF FIRST-AID MEASURES:** Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Route of exposure Symptoms and effects, acute and delayed Description of first-aid measures Inhalation: Normaly does not produce symptoms. Should there be any symptoms, transfer the person affected to the open air. Skin: # Normaly does not produce symptoms. Remove contaminated clothing. Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser. Do not use solvents or thinners. Contact with the eyes produces redness and pain. Remove contact lenses. Rinse eyes copiously by irrigation with Eves: plenty of clean, fresh water, holding the eyelids apart. If irritation persists, consult a physician. Ingestion: If swallowed, may cause gastrointestinal disturbances. If swallowed, seek medical advice immediately and show container or label. Rinse out the mouth with water. 4.2 MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED: The main symptoms and effects are indicated in sections 4.1 and 11 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED: 4.3 Notes to physician: Treatment should be directed at the control of symptoms and the clinical condition of the patient. Antidotes and contraindications: Specific antidote not known. **SECTION 5 : FIRE-FIGHTING MEASURES EXTINGUISHING MEDIA:** 5.1 In the case of fire in the surroundings, all extinguishing agents are allowed. 5.2 SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE: Does not represent a serious fire danger. However, if it is located in a fire, may sustain combustion, decompose and give off toxic or irritant vapours. 5.3 ADVICE FOR FIREFIGHTERS: Special protective equipment: Depending on magnitude of fire, heat-proof protective clothing may be required, appropriate independent breathing apparatus, gloves, protective glasses or face masks and boots. If the fire-proof protective equipment is not available or not used, combat fire from a sheltered position or at a safe distance. The standard EN469 provides a basic level of protection for chemical incidents. Other recommendations: Cool with water the tanks, cisterns or containers close to sources of heat or fire. Bear in mind the direction of the wind. Do not allow fire-fighting residue to enter drains, sewers or water courses. **SECTION 6 : ACCIDENTAL RELEASE MEASURES** 6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES: Avoid direct contact with this product. The floor may become slippery. 6.2 ENVIRONMENTAL PRECAUTIONS: Avoid contamination of drains, surface or subterranean water and soil. In the case of large scale spills or when the product contaminates lakes, rivers or sewages, inform the appropriate authorities in accordance with local regulations. METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP: 6.3 Contain and mop up spills with absorbent materials (sawdust, earth, sand, vermiculite, diatomaceous earth, etc..). Avoid use of solvents. Keep the remains in a closed container. **REFERENCE TO OTHER SECTIONS:** 6.4 For contact information in case of emergency, see section 1. For information on safe handling, see section 7. For exposure controls and personal protection measures, see section 8. For subsequent waste disposal, follow the recommendations in section 13.

Mar <u>i</u>	REVESTIMIENTO LISO "RP-70" Code: 50021	
SECTIO	N 7 : HANDLING AND STORAGE	
	PRECAUTIONS FOR SAFE HANDLING: Comply with the existing legislation on health and safety at work. <u>General recommendations</u> : Usual protection measures for handling chemicals must be adopted. Handle and open container with care. Handle with care, avoiding Keep the container tightly closed. <u>Recommendations for the prevention of fire and explosion risks</u> : The product is not liable to ignite, deflagrate or explode, and does not sustain the combustion reaction by oxygen from air in the envir is, so it is not included in the scope of Directive 94/9/EC concerning equipment and protective systems intended for use in potentially atmospheres. Also they are not applicable the provisions of the ITC MIE BT-29 on the detailed requirements for electrical installations of fire or explosion. <u>Recommendations for the prevention of toxicological risks</u> : Do not eat, drink or smoke in application and drying areas. After handling, wash hands with soap and water. For exposure controls ar protection measures, see section 8. <u>Recommendations for the prevention of environmental contamination</u> : Avoid any spillage in the environment. In the case of accidental spillage, follow the instructions indicated in section 6.	ronment in which it explosive s in locals with risk
	CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES: Keep out of reach of children. In order to avoid leakages, the containers, after use, should be closed carefully and placed in a vertical container tightly closed. For more information, see section 10. Class of store : According to current legislation. Maximum storage period : 24. months Temperature interval : min: 5. °C, max: 30. °C (recommended). Incompatible materials: Keep away from acid products and strongly oxidizing agents. Type of packaging: Sealed containers. The use of unsuitable materials (eg. iron, aluminium, etc) may cause the product to darken. Limit quantity (Seveso III): # Directive 2012/18/EU: # No aplicable. * No aplicable.	I position. Keep
	SPECIFIC END USES: For the use of this product do not exist particular recommendations apart from that already indicated.	

)N 8 :	EXPOSURE CONTROLS/PERSONAL PROTECTION							
	TROL PARAMETERS:							
If a p of the and E	a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. eference should be also made to national guidance documents for methods for the determination of dangerous substances.

	OGICAL LIMIT VALUES: tablished							
Deriv REAC comp	RIVED NO-EFFECT LEVEL (DNEL): rived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in ACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular mpany, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a pocess different of REACH.
